She got a virus that wasn't cured fast enough they did a chest x-ray and found ammonia in her right lung.. The antibiotic they giving her can only be through IV because of her age. I'm not sure how long she will be in the hospital! I will have all the hospital paper work to bring to work..

Wait can't maria give her the treatment? Or jose? Or they don't know how too?

I forget you have a sitter for some reason I though the daycare would not take her smh

Ok hope she feels better... just take tomorrow off to if you too

Thanks.. I should be back Tom. My notes only
